***POA*WAVE** is the first soil surfactant designed to optimize rootzone moisture and plant health in professionally maintained *Poa annua* turf. Featuring patent-pending surfactant and carbohydrate-restorative technology, *Poa*Wave helps counteract root weakening caused by carbohydrate loss under heat and drying conditions. Its dual-surfactant system, powered by PlayTru Technology™, promotes deeper moisture retention while delivering essential proteins, amino acids, and non-structural carbohydrates.

GENERAL USE GUIDELINES

INITIAL APPLICATION
To maximize the key benefits of ***PoaWave***, applications should be made in a programmatic fashion either every **14 or 28 days** during the growing period. Winter applications can be made to prevent turf injury.

WATERING IN
PoaWave does not require immediate irrigation but should be thoroughly watered-in the same evening following application at ~⅓ inch of water in high sand root-zones and ~½ inch in non-sand soils.

WHERE & WHEN TO USE
PoaWave is recommended for use on fine turfgrasses such as those found on golf courses, athletic fields, and other highly maintained turf areas, and may be safely applied at any time during the growing season.
